

## Indicatori di efficienza e resilienza nella specie bovina.

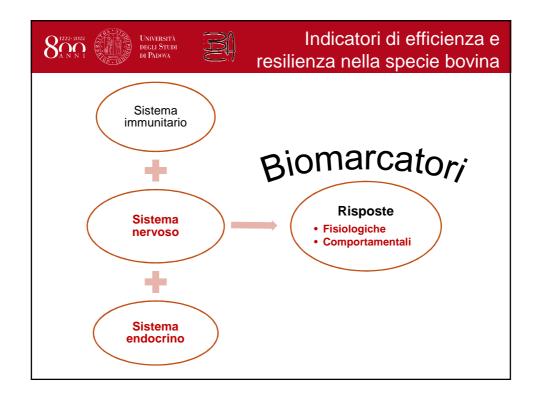

Paolo Mongillo, Elisa Giaretta, Gianfranco Gabai

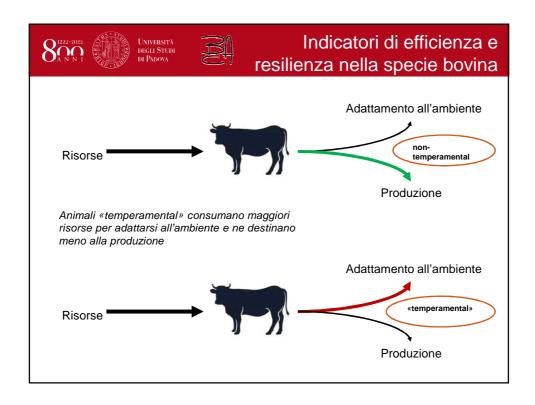

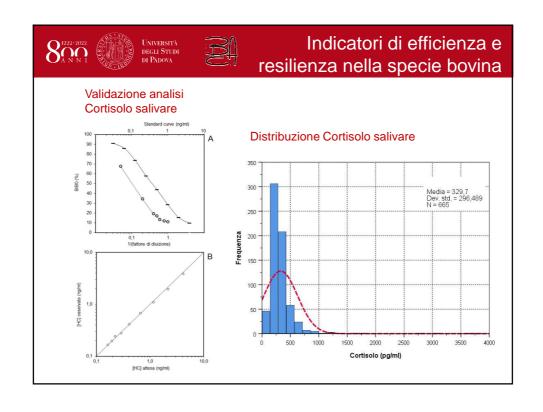

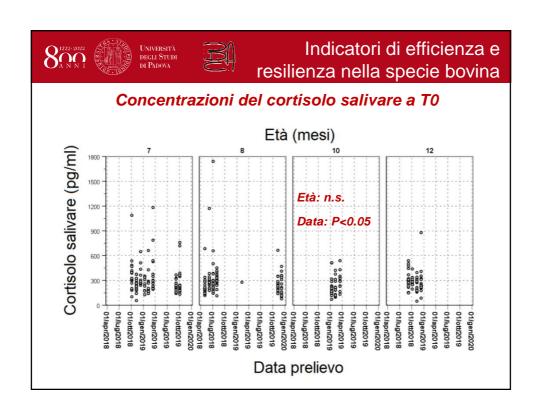

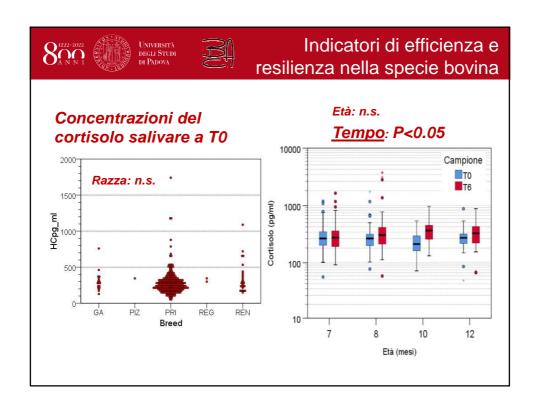

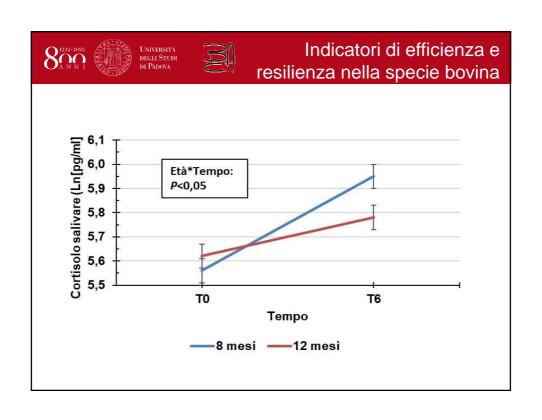

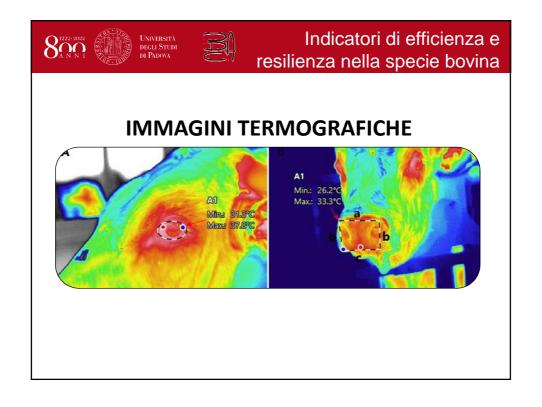

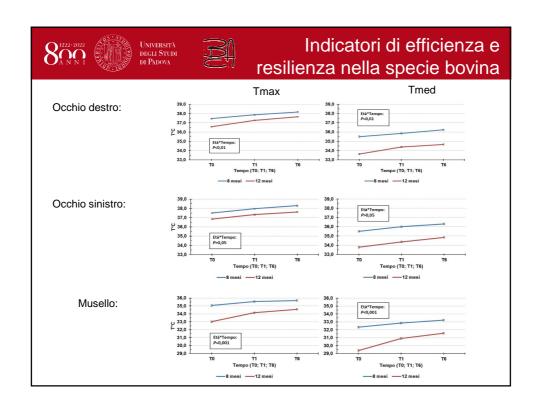

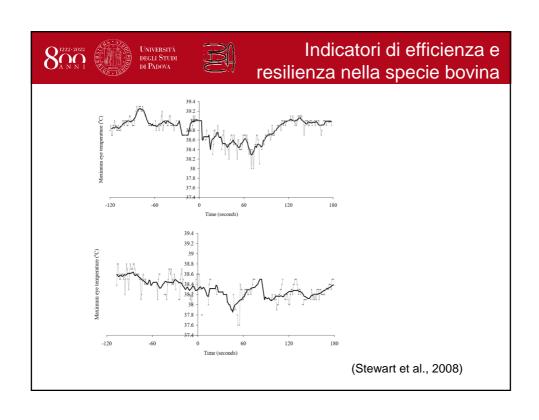

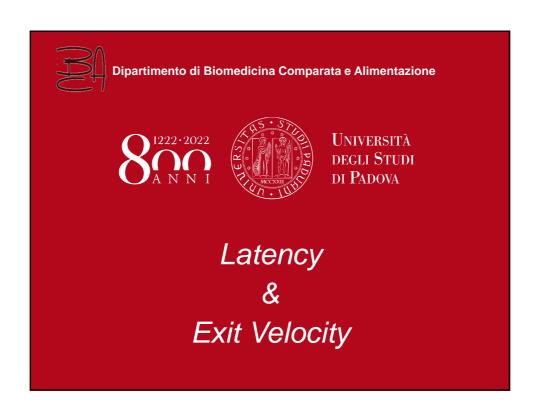

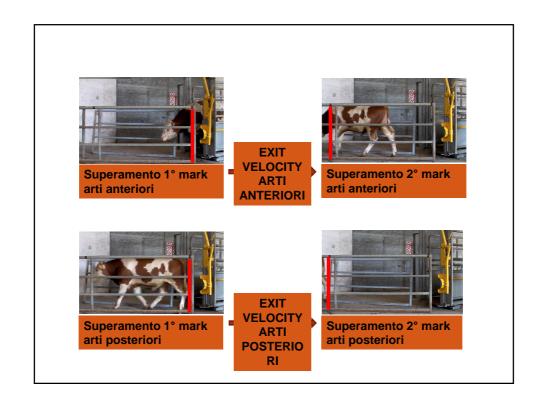

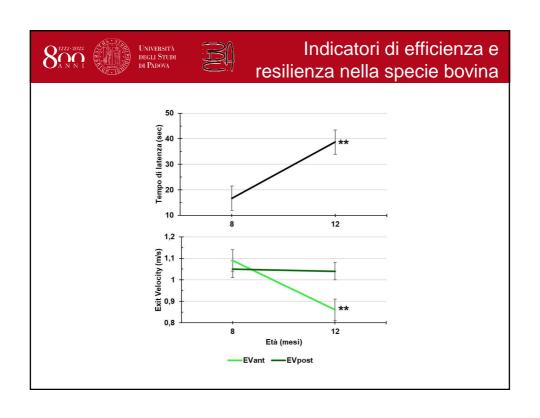

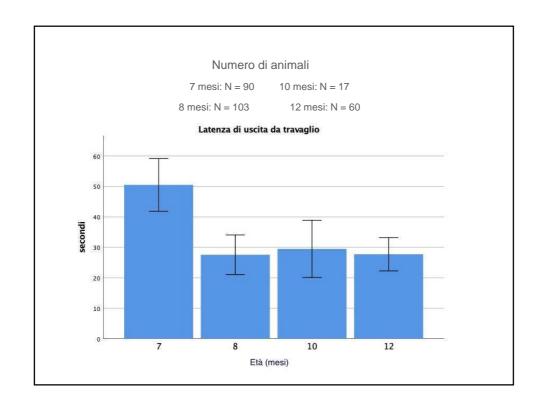

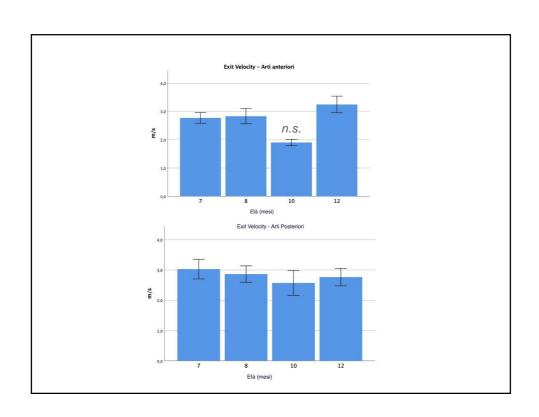

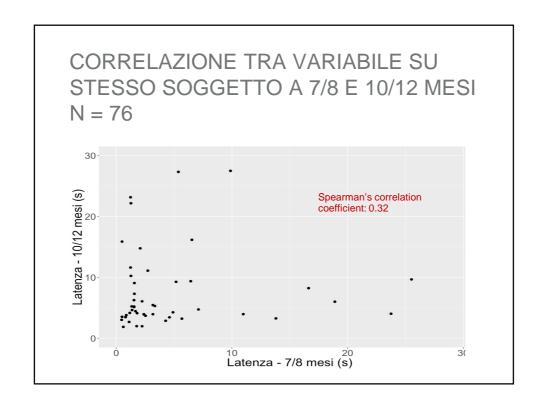

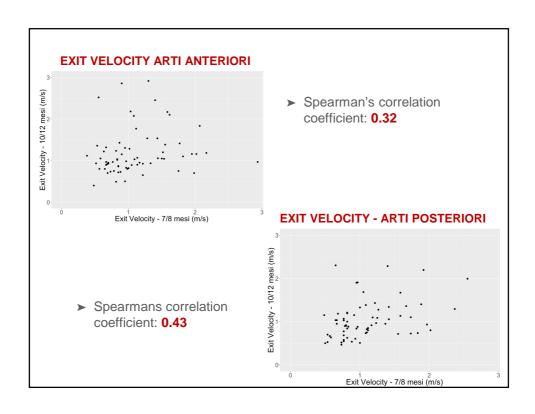

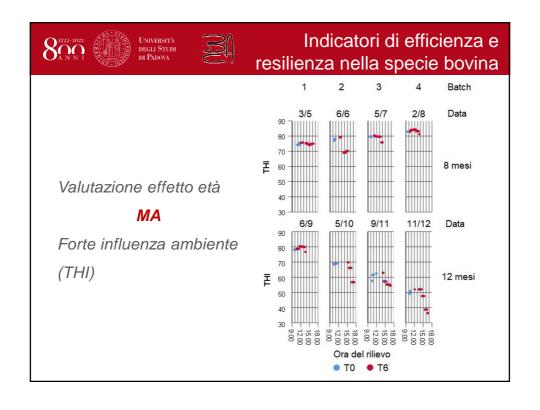

## Indicatori di efficienza e resilienza nella specie bovina

- II «marcatore» è spesso una risposta dinamica
  - Valutare l'intensità della risposta rispetto ad un valore «basale» (T0)
  - «Addestramento» dei rilevatori
- Individuare il «peso» dei fattori ambientali
  - Sistemi di monitoraggio ambientale
- Gli animali si abituano alle condizioni ambientali (possono «anticiparle»)
  - La risposta non è uniforme nel tempo
  - Stabilire QUANDO è opportuno eseguire una misura (età)
- Interazioni animale/uomo
  - Professionalità del personale aziendale (Az. Ricchieri +++)
